# African Development Bank Group Support to Environment and Climate Change

Climate change is undoubtedly the greatest threat to reducing poverty and achieving sustainable development in Africa. As Africa's premier development bank, the African Development Bank is committed to supporting its Regional Member Countries to reduce their vulnerability to climate change.

## Investments:

- The Bank Group is investing in climate compatible development in Africa, enhancing the adaptive capacities of its Regional Member Countries to withstand the adverse impacts of climate change, as well as supporting mitigation projects that aim at reducing greenhouse gas emissions and placing Africa on a low carbon intensive development pathway.
- The African Development Bank recognizes the important role that development plays in building resilience to climate change. It has invested about US\$ 9 billion to provide sustainable infrastructure in the continent in the past decade. The Bank's renewable energy portfolio is in excess of US\$2 billion. Through the Congo Basin Forest Fund, the Bank is supporting global mitigation efforts by reducing the rate of deforestation in the Congo Basin Forests.
- The African Development Bank's Climate Change Action Plan (2010-2014) will implement a large pipeline of climate-friendly projects to ensure a climate compatible development in the continent.

## Recognition:
